

Build on the **it's learning** success!

In our learning platform we give our 2,000,000 users worldwide access to web-based educational applications and content from external suppliers.

What's in it for you?

- Access to millions of users worldwide
- Your applications and content available in all our markets
- Keep 85% of the revenue
- **it's learning** as your reseller
- Easy license administration

Make your applications an
integral part of our
system!

Your plugins in our editor

Give students and teachers instant access to your resources via our text editor: photos, images, videos, articles, animations, or other resources. **it's learning's** rich text editor is used everywhere in the learning platform: dashboards, messages, projects, assignments, tests, and more...

Your tools in our courses

Help teachers and schools save time. Make your application the tool teachers and students use to make tests, quizzes, etc. in **it's learning**. Data generated in your tools will be passed back to the learning platform for use in grade book, class reports and individual reports.

Your content in our platform

Add your digital resources to our content repository to engage students worldwide. With a few clicks, our users can import content into **it's learning** from a range of online resources using international standards. The solution is open to all suppliers of digital resources, and for other learning platforms.
